

## Pairing Instruction

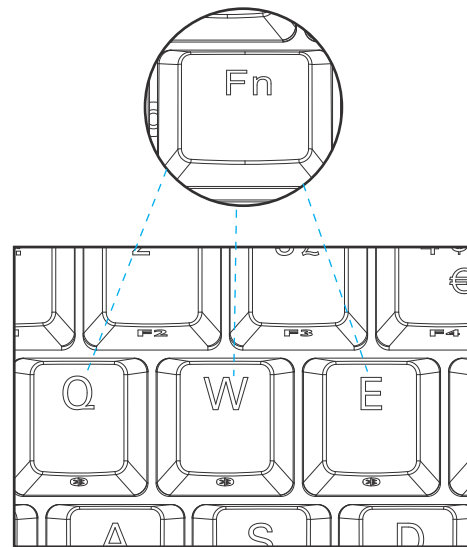

1. Turn on the Bluetooth switch on the back of the keyboard.

2. Turn on the Bluetooth of the device.

3. Press and hold down the **FN** key along with one of the following keys: **Q, W, E**. Hold for several seconds until the white Bluetooth light begins to blink rapidly.

- Flash rapidly : That means the keyboard is ready to pair device ; In contrast, Flash slowly means the keyboard is not connected to any device.

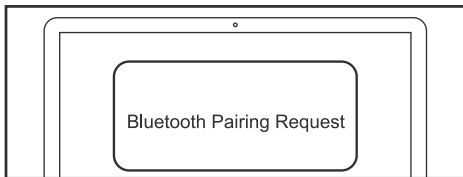

4. Then DREVO KEYBOARD will pop up on the Bluetooth Menu. Click connect.

- Attention: We do not recommend you to connect frequently to multi-devices, and avoid duplicating "connect-delete device" in a short time.

5. Follow the guide to set up the keyboard.

- Once the white light stops blinking and becomes the same color as the other keyboard lights, that then means the keyboard has successfully connected to your device.

6. If you want to store other devices, simply turn off the Bluetooth on the first device connected, and then repeat the steps above by switching to another key's profile (W or E).

7. The system requirements are as follows:

- Attention : This Bluetooth Keyboard only support Bluetooth 4.0 device, so that means you can not use it under the system WIN7 even with a adapter Bluetooth.

Note:

1. The light on the spacebar indicates the battery's charge status. This light will blink red if the battery is low, and blinks green once it begins charging. Once charging is complete the light turns back to normal.

2. The keyboard automatically enters sleep mode after 30 seconds of inactivity while in Bluetooth mode. You can then press any key to activate the keyboard.

3. If you're using this keyboard with pc, turn off the Bluetooth switch on the keyboard before turning off your computer so that the keyboard won't lose the connection with the computer.

4. If you want to modifier keys of this keyboard in a mac, you could download the Karabiner-Elements to remap those keys. ( Because Mac OS doesn't completely support Bluetooth 4.0, the Calibur will be regarded as a general Bluetooth input device and not

a keyboard. Thus, it can be used to type but the keys cannot be remapped without using an app like Karabiner Elements. )

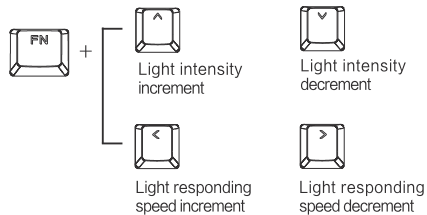

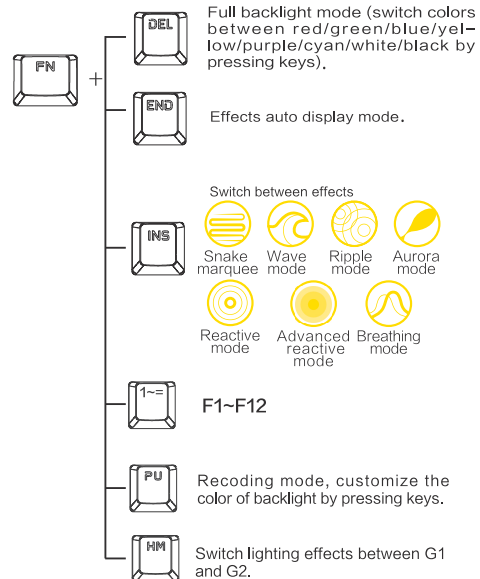

## Backlight Customizing Instruction

1. Press down **FN** + one of **PU/PD** for several seconds until the light starts to flash rapidly.

2. You can design your own backlight scheme by pressing keys with different times. For instance, if you want to change the W from white light to a blue light you press it four times, light color changes by the times you press. This same process can be repeated for all keys on the keyboard.

3. Press **FN + PU/PD** again (the one you originally pressed) to store your scheme.

## Lighting Effects

FN + Left Win : Window lock key.  
 FN + Left Ctrl : Switch the Ctrl and Caps key function.  
 FN + Space : Play/Pause lighting effects.  
 FN + Backspace : Light on mode.

## Reset the Keyboard

You can reset the keyboard by pressing down ESC+Backspace+Left Ctrl+Right Ctrl for 5 seconds.

## DREVO Mechanical Keyboard

### Warranty (1 Year Limited Warranty)

#### 1. 10-Day Money-Back Guarantee for Any Reason

If the reason for return isn't related to its quality, the customer is responsible for return shipping costs.

#### 2. Warranty for Quality-Related Issues
